

**Dr Linda Campbell**

BSc (Honours), University College London, UK

Master of Psychology (Clinical), University of Newcastle, Australia

PhD (Psychology), Institute of Psychiatry, King's College London, UK

Clinical Psychologist

Linda is a Senior Lecturer at The University of Newcastle and also work as a Clinical Psychologist in private practice. Linda has particular interest in working with young people with developmental disorders and their families. Linda has eighteen years' experience working with 22q11.2 deletion syndrome. She undertook her PhD and post-doctoral work exploring cognition and behaviour among young people with 22q11.2 deletion syndrome as well as with other chromosomal disorders associated with intellectual disabilities such as Williams syndrome. Since then she has done a lot of work on the impact that having a child with a disability can have on families.

Linda is trained in a variety of therapeutic approaches including Cognitive Behavioural Therapy, Acceptance and Commitment Therapy and Solution Focussed Therapy, which enables a flexible therapeutic approach in clinical practice. She has significant experience in assessments and is also experienced in a wide variety of psychological areas including as well as autism spectrum disorders learning disorders, anxiety disorders, attention problems, obsessive-compulsive disorder behavioural, emotion dysregulation, and anger management. Linda is committed to providing individualised assessment and treatment plans based on current research and provides the best fit for the client
